

BETTER PERFORMANCE. LOWER PRICE.

Introducing the Seam Master Signature Series with Fusion Technology

Look, what do you really want in a seaming tape? Better performance... lower cost... right? Well, that's exactly what you get with the new Signature Series tapes from Seam Master. Seam Master calls their break-through tape-making process Fusion Technology. With Fusion Technology Seam Master completely reinvents fiber-reinforced tape by actually encapsulating the reinforcing fiberglass webbing in the adhesive beads.

With Signature Series tapes you get precise, well defined beads, higher-stick adhesive, a wider adhesive band, a heavier reinforcing web and the elimination of exposed webbing. In other words, a super-strong tape for less money.

Signature Series... because your seam is your Signature.

ONETAPE

- Advanced adhesive formula
- LOW MELT Formula
- LOW profile
- Works on ALL backings and carpet types
